

Bharatiya Vidya Bhavan's
SARDAR PATEL INSTITUTE OF TECHNOLOGY
(Autonomous Institute Affiliated to University of Mumbai)
Munshi Nagar, Andheri (W), Mumbai – 400 058.
Department of Computer Science and Engineering

Experiment	5
Aim	Create an app for MCA department using side and tabs navigation
Objective	<ul style="list-style-type: none">• To Create MCA App using UI Component• To Develop SideDrawer and Tabs Navigation in one application• To Use 60-30-10 rule• To Use Webview concept• To Use Expandable Card View Concept
Name	Abhijeet Shrimant Jadhav
UCID	2024510021
Class	MCA
Batch	A
Date of Submission	15-03-2025

Technology used	Framework- Flutter, Tool used - Android Studio Programming- Dart
Task	Create an app for MCA department using side and tabs navigation consisting of the following: <ol style="list-style-type: none">1) Faculty information with Expandable Card view2) Department Vision and Mission with expandable Card view3) Notification of any upcoming event (links to the website).4) WebView5) Feedback form along with rating
Code with proper label	main.dart : <pre>import 'package:flutter/material.dart'; import 'splash_screen.dart'; // Import the Splash Screen void main() { runApp(const MainApp()); } class MainApp extends StatelessWidget { const MainApp({super.key}); @override Widget build(BuildContext context) { return MaterialApp(debugShowCheckedModeBanner: false, home: SplashScreen(), // Start with SplashScreen); } }</pre> about.dart : <pre>import 'package:flutter/material.dart';</pre>

```
class AboutPage extends StatelessWidget {  
  @override

Please ensure that an implementation of 'WebViewPlatform' has been set to 'WebViewPlatform.instance' before use. For unit testing, 'WebViewPlatform.instance' can be set with your own test implementation." See also: https://docs.flutter.dev/testing/errors </pre> </div>
<p>Question and Answers</p>	<p>Answer the following Questions:</p> <ol style="list-style-type: none"> How to create SideDrawer and Tabs Navigation both? Ans : Use Flutter's Scaffold widget with the Drawer property for a side drawer and integrate TabBar with TabBarView for tab-based navigation. How did you use the 60-30-10 rule in your application? Ans : This rule guided the UI design by allocating 60% for primary content, 30% for secondary elements, and 10% for accent details, ensuring a balanced layout. Which new elements did you use for creating UI components?

	<p>Ans : Incorporated modern Material design widgets like Card, ListTile, and custom animations along with responsive layouts to enhance the UI experience.</p> <p>4. In pubspec.yaml file, what dependencies need to be there? Ans : Include essential dependencies such as flutter, cupertino_icons, and packages like http, provider, flutter_svg, and webview_flutter based on project needs.</p> <p>5. How to create an Expandable view? Ans : Implement an expandable view using widgets like ExpansionTile or ExpansionPanelList to allow smooth expansion and collapse of content.</p> <p>6. How to create Webview? Ans : Utilize the webview_flutter package by adding it to pubspec.yaml, then embedding the WebView widget in your widget tree to load web content</p>
Conclusion	<p>The approach integrates robust navigation using both side drawer and tabs, applies the 60-30-10 rule for a balanced UI design, and leverages modern UI components alongside essential dependencies. The inclusion of expandable views and WebView functionality further enhances the user experience, resulting in a cohesive and feature-rich Flutter application.</p>
